Employment History

Citibank India
Manager

January 2015 - Present

The project is focused on building a monitoring application for supervisors to manage alerts generated due to potential misconduct by a trader while conducting a transaction

- Designed dynamic and responsive pages using Angular, Javascript, HTML and CSS
- Implemented flux pattern using Rxjs as core dependency
- Created responsive UI using Angular Material
- Utilize Jasmine, Karma, gulp and npm tools to build and test
- Took additional charge of Scrum Master for the offshore team
- Using Jira to keep tracks of bug to reduce downtime, increase productivity and communication

Citiustech Healthcare Technology Private
Limited
Senior Software Engineer

Navi Mumbai, Maharashtra
May 2012 - December 2015

The application was designed to allow physicians to view medical images directly onto their browsers.

- Developed the application using JavaScript framework and MVVM framework library KnockoutJs
- Used LESS to build CSS files
- Built responsive pages using bootstrap

iGate Corporation
Associate Engineer

Navi Mumbai, Maharashtra
November 2009 - April 2012

The project involved migrating the existing client data to xml format to make the information platform independent

- Built a windows application using C# to convert all the information from the word files to xml
- Used IBM's DB2 to perform bulk operation to maintain consistency while migrating the data

Education

K J Somaiyya College
Bachelor's Degree

Graduated July 2009
