PROJECT SUMMARY

1) Project - Global Concentration Engine.

Title	GCE (Self Service)
Client	Citi Bank
Team Size	15
Role	Sr. UI Developer
Environment	AngularJs (1.6), HTML/HTML5, CSS/CSS3 and Bootstrap, git , source tree, javascript
Duration	Aug 2017 to till date

Project_Description:

Global Concentration Engine(GCE) is a cash concentration solution for target balancing in global context. GCE will provide GTS with single rationalized platform for global target balancing that offers market leading capabilities to customers and reduces operating costs. The application provides following business capabilities :

- Sweep cash from source to destination accounts
- Minimize deficit positions to reduce funding costs
- Maximize the return on surplus cash position
- Operation on true end of day basis
- Offer readymade and highly customized solutions

Responsibilities:

- Development of business specific components in Angularjs using Bootstrap, HTML5, CSS3 and JavaScript
- Design document like component layout, flow diagram and end points.
- Implement complex business logic as per the requirement.
- Implement business validation
- Integration with back end services(developed using JAVA Spring Boot)

2) Project - UDD (Unified Design Dictionary) - Pune

Title	UDD
Client	FCA US LLC (<i>Fiat Chrysler Automobiles</i>)
Team Size	20
Role	Sr. UI Developer
Environment	Angular 2, HTML5, CSS3 and Bootstrap
Duration	July 2016 to July 2017

Project_Description:

FCA wants to build a tool which will act as a common repository for control and software team. This is single source of information where engineer can maintain database and change architectural attribute up to some extent. The tool will also allow developer to generate engineering build. This should be carried out through web based tool. This tool will allow developer or integrator to manage day to day activity of building build or check-in out through single application without manually interacting with different application.

Responsibilities:

- Handling team of freshers, directly reporting to me.
- Taking the complete ownership of the task assigned and delivering task on time.
- Designing and documentation of architecture based on Requirements.
- Reviewing the Source code and process.
- Interacting with onsite co-ordinator for gathering requirements.
- Gaining the domain knowledge of the system to understand client requirements and analyse feasibilities.
- Team Mentoring: Assign task, doing estimation. Provide technical help.

3) Project - Unify JLR - Pune

Title	Unify JLR
Client	Jaguar and Land Rover
Team Size	15
Role	Sr. UI Developer
Environment	Angular JS (1.5), Html 5 , CSS 3, Bootstrap
Duration	Sept 2014 to July 2016

Project Description:

Unify JLR is product which is implemented as per the requirement. It is very flexible and scalable. This product is used to track and maintain the releases of upcoming vehicle models. It tracks application and calibration of that vehicle tracker release. It is tracking all details showing delayed, completed and in progress status. Showing phase wise tracker and track its details in details.

User can create, modify and delete the release tracker. Even activate and deactivate the release tracker and its phases. Tracking worst tracker and delay days in release. Showing data on UI also integrate various charts to show different data also providing export functionality to generate various reports.

Responsibilities:

- Handling team of four resources.
- Render data on UI, which comes into JSON format.
- Form validation and showing messages on UI
- Implement filters (Using custom and inbuilt filter).
- Format that data based requirement.
- Integration of third part library (like high chart and dhtml).
- Design UI and database table.

- Showing data in different chart like (donut chart, line chart, column and stack column chart).
- Customization of chart as per requirements (like Gantt chart).

4) Project - L&T Insurance, Mumbai

Title	IDIT
Client	L&T General Insurance
Team Size	50
Role	Developer
Environment	HTML, CSS and Javascript
Duration	Aug 2010 to July 2014

Project Description:

IDIT™ insurance system supports all General (P&C) personal and commercial lines of business, including home owners, fleet insurance, health insurance, medical insurance and term-life insurance products.

User can open new policy and also renew the existing policy. It also provide functionality, user can make endorsement on policy.

It is makes all insurance process automated. User can manipulate and maintain online.

Responsibilities:

- Product Development.
- Production support
- Handle Customer Bug report and Change Request.
- Design screen as per mock ups for different releases.

PERSONAL DETAILS

Name	Mr. Rajesh Madewar
Father's Name	Mr. Murlidhar Eknath Madewar.
