URL:	http://teamwise.in

Github And Stackoverflow Profile

Github Profile URL: https://github.com/mjangir

Stackoverflow URL: https://stackoverflow.com/users/1029506/manish-jangir

Created a few useful repository packages for NPM and Composer as well:

1. React-Redux-AdminLTE: Creating an extremely powerful boilerplate to enable anybody to quickly start a website with two modules frontend and backend. The boilerplate is going to provide a lot of CLI tools to automate your development. (**Though Just Started)**

https://github.com/mjangir/react-redux-adminlte

1. React Scrollify: This is a react version of famous perfect scrollbar to make the smooth and beautiful scroll in React.

https://github.com/mjangir/react-scrollify

2. MKXMLBUILDER: Generate your custom XML with this nice Javascript Module:

https://github.com/mjangir/mkxmlbuilder

3. MKJUPLOADER: This is nice PHP composer package to upload and delete files in direcotry as well as database also.

https://github.com/mjangir/mkjuploader

4. SmartAjax: In progress but building a very powerful library to handle all the ajax functionality in an application.

https://github.com/mjangir/smartajax

5. Live Table Edit jQuery: Created live table edit with jQuery just for fun in initial jQuery learning days (4 years ago).

https://github.com/mjangir/live-table-edit-jquery

Other Activities

Given training on Basic to Advance Javascript for many weeks in current organization.
